

2010 Conference : Economic recovery -Value Analysis can help!

Located at :
Montreal, Quebec

This year the Canadian Society of Value Analysis conference will be held in **Montreal** on **November 15th and 16th**, 2010. Our conference will highlight how Value Analysis/Value Engineering/Value Management can be an effective strategy to enable governments, businesses and other organizations to successfully escape the economic slump and participate to the economic recovery by maximizing value in their projects, products and services.

More than ever, the sustainability of businesses and the effectiveness of all require strategic and optimized investment of resources. The systematic use of Value Analysis enables industry, government and the service sector to achieve value in their projects so all can say "I got my money's worth!"
